

VIBHAV MISRA

New York, NY 11206 | vibhavemail@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Work Authorization: Authorized to work in the U.S. under F-1 OPT/ STEM OPT extension for 3 years. **No sponsorship required.**

SUMMARY

- **Data Science Master's graduate** with experience applying analytics, machine learning, and business intelligence techniques to analyze complex datasets and solve real-world problems.
- Proficient in **Python, SQL, Power BI, Tableau, and statistical modeling**, with hands-on experience building predictive models, forecasting workflows, dashboards, and KPI-driven reporting solutions.
- Experienced in communicating technical findings to **non-technical stakeholders** through clear visualizations and reports.

EDUCATION

Pace University, Seidenberg School of Computer Science and Information Systems	New York City, NY
Master of Science (MS) in Data Science Honors: magna cum laude GPA 3.76	May 2026
Chandigarh University, Apex Institute of Technology	India
Bachelor of Engineering (BE) in Computer Science with a specialization in Artificial Intelligence and Machine Learning	June 2024

TECHNICAL SKILLS

Programming/ Query Languages: Python, SQL, R, SAS

Machine Learning & Data Processing: TensorFlow, scikit-learn, Keras, XGBoost, Pandas, NumPy, PySpark, Forecasting, Model Evaluation

BI & Visualization: Power BI, Tableau, Excel, Looker, Matplotlib, Seaborn, Plotly, KPI Reporting, Dashboard Development

Cloud Platforms & Tools: AWS (S3, Lambda, and EC2), Google Cloud Platform (GCP), Jupyter Notebook, Google Colab, VS Code

Model Deployment & DevOps: Docker, Streamlit, CI/ CD pipelines, Git, GitHub

WORK EXPERIENCE

Data Science Intern EdMyst Inc. Lewes, DE	June 2025 - September 2025
• Designed a 2-layer long-term memory framework for an AI coaching platform, integrating 7 user-data sources across 8 personalization use cases to support adaptive, cross-session coaching. • Built a Python context-builder module that combined user memory, performance reports, and feedback for dynamic prompt generation using 10+ behavioral and sentiment signals. • Developed a real-time video ingestion workflow using WebSockets and AWS S3, with buffering and failure-recovery mechanisms. • Automated Google Sheets reporting with Apps Script, consolidating 70+ daily data tabs into KPI, trend, client-level, and error-analysis dashboards.	

PROJECTS

Global Economic Stress Early-Warning System	May 2026
Tech: Python, Pandas, Scikit-learn, FRED API, Plotly, Matplotlib, time-series backtesting	
• Aggregated and aligned 90+ years of quarterly macroeconomic indicators from the FRED API across all G7 nations, including yield spreads, unemployment, and inflation. • Built and backtested a consensus early-warning system using Logistic Regression and Random Forest with class balancing, and developed diagnostic risk timelines and macro-stress heatmaps to visualize cross-country economic stress.	
NYC 311 Service Quality & Operational Performance Dashboard	February 2026
Tech: PostgreSQL, SQL, Power BI, DAX, star-schema modeling, KPI analysis, SLA reporting	
• Modeled and analyzed 5M+ NYC 311 service requests using a PostgreSQL star schema to evaluate SLA adherence, agency performance, resolution efficiency, and backlog trends. • Developed an interactive Power BI dashboard for 15+ agencies, identifying operational bottlenecks including resolution times up to 3x the city median and translating findings into improvement recommendations.	
Will I Catch That Train? - Real-Time NYC Subway Tracker	August 2025
Tech: Python, Streamlit, Pandas, GTFS/GTFS-RT, Folium, Hugging Face Spaces	
• Built and deployed a real-time commute application for 3 NYC subway lines, integrating static GTFS schedules with 2 live GTFS-RT feeds for train arrivals and service updates. • Developed a time-based interpolation pipeline and interactive map for estimated train positions, platform-specific arrivals, and personalized "Leave Now" recommendations based on walking time and configurable buffers.	

RESEARCH & PRESENTATIONS

Seidenberg Annual Research Day (SARD), Pace University	December 2025
• Conducted trend and seasonality analysis using ARIMA, SARIMA, and Prophet on NYPD hate-crime data, and communicated the findings through a research presentation.
